

Jacto A200 - A500 MINITOWER

- Excellent for blueberries, blackberries, raspberries, grapes, most spindle or trellised fruit crops and some nursery tree applications
- Quickly and easily mounts to any A200 or A500N or A500TSprayer.
- The Minitower utilizes the existing 16 flip over nozzle holders and ceramic nozzles from the A200 or A500.

- Engineered with precise air channels, the Minitower delivers directed uniform airflow from top to bottom, bringing the nozzles closer to the target area, reducing the droplet travel distance and potential for evaporation and drift.

- Made of HDPE and color closely matched to the fan housing with UV protection for long life and durability.
- When installed on the A500 the overall height from the ground is 80 inches.
